---

**Harvest Technology Group – Alpharetta, GA**

Aug 2000 – Present

*Technology consulting firm that develops custom solutions to enterprise content management.*

**Programmer + Professional Services Consultant**

- Work directly with hundreds of North American clients to understand their goals, specifically related to workflow, storage, or document management pain points
- Propose solutions for Electronic Content Management (ECM) using Bottomline Technologies software, including Optio (document and EHR solutions) and OnBase (CMS, workflow tools)
- Develop, test, integrate, and deployed software solutions using DCL programming language
- Create detailed project estimates, roadmaps, and delivery guidelines

**Recent clients:**

- City of Calumet - *Bilingual Water Bill Design*
  - Developed system in DCL that accepts raw text utility bill data from SunGard, and translates data from English to Spanish when needed
  - Designed final printed water bill, complete with custom-designed text, graphics, city seal
- Kaiser Aluminum - *Certified Test Report*
  - Implemented system in DCL that accepts raw unformatted text reports of several pages in variable length, formats output to human-readable design with various custom fonts, graphics, logos, outputs to PCL, PostScript, and PDF documents

**Support Analyst**

- Provided support for any subsequent issues after project delivery and fulfilled enhancement requests after completion of consulting engagements
- Supported 2000+ clients representing \$500,000+ ARR

**Trainer**

- Developed curriculum and taught week-long training classes on Optio DesignStudio and DCL
